

MIAN AZAN

Full Stack Developer | Vue.js · React.js · Laravel

Vienna, Austria | mianazan3@gmail.com | +43 681 10369733 | [mianazan.netlify.app](#) | [github.com/Mian1930](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years building and scaling production web applications with Vue.js, React.js, and Laravel. Proven track record of improving performance at scale (5M+ monthly API requests, 40% faster response times, 35% Core Web Vitals gains) and driving measurable business outcomes, including an 18% churn reduction and contributing to 200% revenue growth on a SaaS platform serving 10,000+ users. Skilled in component architecture, API optimization, analytics instrumentation, and cross-functional feature delivery.

TECHNICAL SKILLS

Frontend: Vue 3 (Composition API), React.js, JavaScript (ES6+), jQuery, Bootstrap, Responsive/Mobile-First Design

Backend: Laravel, PHP, Python, MySQL, REST APIs, Redis

Cloud & Tools: AWS, Git/GitHub, ESLint, Prettier, Storybook, Mixpanel

Practices: Performance Optimization, WCAG 2.1 Accessibility, Automated Testing, Agile/Scrum, Design Systems

WORK EXPERIENCE

Software Engineer — SocialBu

Oct 2021 – Present

Vue.js · Laravel · AWS · SaaS platform, 10,000+ users

- Engineered 50+ reusable Vue.js components, reducing feature development time by 25% across the engineering team.
- Optimized 5M+ monthly API requests via Redis caching and query tuning, cutting average response times by 40%.
- Instrumented Mixpanel analytics across 15+ user flows, surfacing insights that contributed to an 18% reduction in churn.
- Led development of core engagement features from spec to release, driving a 30% increase in user engagement during a period of 200% revenue growth.

Front-End Engineer — InvoZone

Jun 2021 – Oct 2021

- Built 20+ data dashboards in Vue.js and React.js for client-facing analytics, contributing to a 22% increase in user engagement; used virtual scrolling to cut rendered DOM nodes by 60%.
- Integrated a shared component library across product teams, cutting design-to-development handoff time by 50%.

Front-End Developer — IVY Lab Technologies

Jan 2021 – Jun 2021

- Refactored a legacy jQuery codebase into reusable Vue Composition API components, raising Lighthouse performance score from 65 to 92 via code splitting and image optimization.

Associate Software Engineer — Programmers Force

Sep 2020 – Dec 2020

- Shipped 15+ features across Vue.js and React.js codebases, contributing to a 20% increase in user retention; raised automated test coverage from 40% to 85%.
- Standardized code quality across an 8-developer team by introducing ESLint and Prettier.

Junior Front-End Developer — J&Q Technologies

Apr 2019 – Jul 2020

- Built 10+ mobile-first websites (95+ Lighthouse scores), achieving WCAG 2.1 compliance and reducing accessibility issues by 75%.
- Automated component documentation with Storybook, cutting UI review time by 40%.

PROJECTS

SocialBu (socialbu.com): Social media automation platform; core contributor to frontend architecture and performance.

LinkMngr (linkmgr.com): Branded link management tool.

EDUCATION

MS, Computational Science & Engineering — TU Wien, Austria (2024 – Present)

BS, Software Engineering — Minhaj University, Lahore (2014 – 2018)
